

HLS-C408B-M

Intelligent template machine

Smart stitch-control system Handles intricate patterns with precision, delivering premium-quality stitches

Application:

Primarily designed for apparel manufacturing processes such as pocket openings and trouser placket construction, featuring template-guided precision stitching operations.

Advantages

1) In-Line Usage:

Machine dimensions 1200*1200mm, designed for seamless integration into production lines.

2) Intelligent Closed-Loop Sewing System:

Monitor sewing status in real-time and precisely regulates the process through dynamic feedback interaction.

3) RFID Chip Recognition Technology:

Delivers rapid response, high sensitivity, and pinpoint accuracy.

4) Plunger Oil Supply Mechanism:

Utilizes a mechanical plunger system to ensure consistent and stable lubrication.

5) Long-Stroke Needle Bar Mechanism:

Maximum needle lift height of 22mm, compatible with templates or fabrics of varying thicknesses for versatile applications.

6) Electronic Presser Foot:

Adapts intelligently to materials of different densities and thicknesses.

7) Screw Drive System+Closed-Loop Motor:

Achieves sewing precision up to 0.1mm level.

8) Optional Functional Modules:

Automatic Bobbin Changer, Automatic Stitch Start Device, and Suction Air flow System

型号 Model	HLS-C408B-M	气压 Air pressure	0.5Mpa 1.8L/min
最高缝纫速度 Highest sewing speed	3500rpm	电源 Power Supply	单相 Single-Phase 200V-240V
缝制范围 Sewing range	800X400mm	净重/毛重 Net Weight/Gross weight	300KG/400KG
机针型号 Needle type	DPX5 11#	外形尺寸 Dimensions	1200X1200X1260mm(L*W*H)
